The effect of sequence order of combined training (resistance and endurance) on strength, aerobic capacity and body composition in older women

Protocol summary

Summary

The main purpose of this study is to investigate the effect of sequence order of combined training (resistance and endurance) on strength, aerobic capacity and body composition in older women. This study is a quasi-experimental research, 60 retired elderly woman of Education select purposely and randomly place into four groups of 15 subjects: endurance plus strength training, strength plus endurance training, interval concurrent training and control groups then the weight, height, body mass index, body fat percentage, maximum strength and maximal oxygen uptake be measure. Training programs will be perform for eight week, 3 times per week. Endurance training program Include a cycle ergo-meter and strength training program Include several upper and lower body workout. Forty-eight hours after the last training session all variables will be measured as per-test.

Scientific title

The effect of sequence order of combined training (resistance and endurance) on strength, aerobic capacity and body composition in older women

Public title

The effect of sequence order of combined training (resistance and endurance) on the body performance of older women

Purpose

Diagnostic

Inclusion/Exclusion criteria

Inclusion criteria: female; 58 to 70 years; without experience of regular physical activity in one year before beginning of the study; the level of physical and mental health Exclusion criteria: history of cardiovascular diseases; cancer; high blood pressure; diabetes; thyroid

disease; addiction to any smoking, alcohol and narcotic substances; Hormonal disorders; kidney or liver disease; surgery any medical intervention affecting the experimental results

Age

From **58 years** old to **70 years** old

Gender

Female

Phase

N/A

Groups that have been masked

No information

Sample size

Target sample size: **60**

Randomization (investigator's opinion)

Randomized

Randomization description

Blinding (investigator's opinion)

Single blinded

Blinding description

Placebo

Not used

Assignment

Parallel

Other design features

Aerobic training perform on a cycle ergomete and
Resistance exercise with gym apparatus.

Health conditions studied

1

Description of health condition studied

Relationship of sequence order of combined training
(resistance and endurance) on strength, aerobic capacity
and body composition in older women

ICD-10 code

R54

ICD-10 code description

Senility

Primary outcomes

1

Description

Maximum strength

Timepoint

Before and after 8 weeks of intervention

Method of measurement

By use 1 Repetition Maximum formul

2

Description

Maximal oxygen uptake

Timepoint

Before and after 8 weeks of intervention

Method of measurement

Modified Bruce treadmill test

3

Description

Body fat percent

Timepoint

Before and after 8 weeks of intervention

Method of measurement

Using calipers Base Line

4

Description

Weight

Timepoint

Before and after 8 weeks of intervention

Method of measurement

Weight meter Seca

5

Description

Height

Timepoint

Before and after 8 weeks of intervention

Method of measurement

Using a height gauge model Saros

6

Description

Body Mass Index (BMI)

Timepoint

Before and after 8 weeks of intervention

Method of measurement

Weight divided by height squared

Secondary outcomes

empty

Intervention groups

1

Description

The endurance plus strength training group follow an combined training program for 8 weeks Who in the first do endurance training program and then 2 minutes of rest do strength training program.

Category

Other

2

Description

The strength plus endurance training group follow an combined training program for 8 weeks Who in the first do strength training program and then 2 minutes of rest do endurance training program.

Category

Other

3

Description

The interval training group do rotating E plus S plus E plus S plus E plus S training programs , so that's the strength and endurance program was divided into three parts.

Category

Other

4

Description

The control group do not any regular physical activity in Daily life.
