Effect of omega-3 supplementation on social, communication and behavior problems children with autism spectrum disorder

Protocol summary

Summary

Autism spectrum disorders(ASD) are neurological disorders with different causes. Its assumed that children with ASD have abnormal neural connection, synaptic function and neurotransmitter imbalance. One study in Iran showed that ASD prevalence in school children is 1.9%. Although the cause of Autism is unknown, But environmental, Genetics and metabolic factors can be involved. It looks like that Genetics have a underlying role in ASD development. Other involved factors include Immunological, prenatal, neurological-anatomical and biochemical-psychological factors. According to increasing prevalence of Autism and because there is not any study on Omega-3 supplementation in people with Autism, current study is performed to investigation of effects of Omega-3 supplementation in patients with Autism and determine the condition of behavioral indices.

General information

Acronym

The effect of Omega-3 on Autism spectrum disororders

IRCT registration information

IRCT registration number: **IRCT2015122625699N1**
Registration date: **2016-01-24, 1394/11/04**
Registration timing: **registered_while_recruiting**

Health conditions studied

1

Description of health condition studied
Autism Spectrum Disorders
ICD-10 code
F84.0
ICD-10 code description

Primary outcomes

1

Description
Autism severity
Timepoint
Before intervention and 2 months after intervention
Method of measurement
GARZ Questionnaire

Secondary outcomes

1

Description
Social ineractions
Timepoint
Before and 2 months after intervention
Method of measurement
GARZ Questionnaire

2

Description
Communication
Timepoint
Before and 2 months after intervention
Method of measurement
GARZ Questionnaire

3

Description
Repeated behaviours
Timepoint
Before and 2 months after intervention
Method of measurement
GARZ Questionnaire

Intervention groups

1

Description
The case subjects receive 1 omega-3 capsula daily produced by Zahravi company, Iran.
Category
Treatment - Drugs

2

Description
The control subjects receive 1 placebo capsula daily produced by same company.
Category
Placebo
