Effect of Buccal Fat Pad Derived Mesenchymal Stem Cells Loaded on Allograft with Platelet-rich Plasma in Maxillary Sinus Augmentation

Protocol summary

Summary

This study aims to assess the effectiveness of mesenchymal stem cells with allografts and platelet rich fibrin (PRF) in maxillary sinus bone augmentation.This study includes 20 patients with less than 5 mm bone height between alveolar crest and sinus membrane. The samples are randomly allocated (with use of blocks) to two groups of test and control with 10 patients and will receive the surgery at Department of Oral and Maxillofacial Surgery at Shahid Beheshti University of Medical Sciences. In the test group, buccal fat pad derived stem cells (BFPSCs) is harvested from buccal fat pad tissue of the patients. In the test group the patients receive a combination of PRF and freeze dried bone allograft (FDBA) (SureOss, Hansbiomed, Korea) loaded with BFPSCs. The control group receives FDBA (without any cells)+PRF. In all the groups the combination is placed over the maxillary sinus membrane. The results will be evaluated by cone beam computed tomography (CBCT) and hematoxylin and eosin staining in 6 months.

Scientific title

Effect of Buccal Fat Pad Derived Mesenchymal Stem Cells Loaded on Allograft with Platelet-rich Plasma in Maxillary Sinus Augmentation

Public title

Effect of Buccal Fat Pad Derived Stem Cells in Maxillary Sinus Augmentation

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion Criteria: Patients with posterior maxillary edentulism; pneumatized sinus; less than 5mm bone height between the alveolar crest and sinus membrane Exclusion Criteria:Smoking; history of malignancy; radiation; chemotherapy; pregnancy; systemic diseases contradicting dental and surgical treatments; conditions

or drugs affecting bone remodeling or bone metabolism and connective tissue; allergy to collagen

Age
From **18 years** old to **139 years** old

Gender
Both

Phase
1

Groups that have been masked
No information

Sample size
Target sample size: **20**

Randomization (investigator's opinion)
Randomized

Randomization description

Blinding (investigator's opinion)
Not blinded

Blinding description

Placebo
Not used

Assignment
Parallel

Other design features
Randomization was performed by randomization blocks

Secondary Ids

Approval date
2013-09-23, 1392/07/01

Ethics committee reference number
Ir.sbmu.rids.rec.1392.9212

Health conditions studied

1

Description of health condition studied
Maxillary bone deficiency

ICD-10 code
-

ICD-10 code description
-

Primary outcomes

1

Description
Amount of regenerated bone

Timepoint
Before the surgery and 6 months after the surgery

Method of measurement
Cone beam computed tomography and histology (microscopic evaluation)

Secondary outcomes

1

Description
-

Timepoint
-

Method of measurement
-

Intervention groups

1

Description
Intervention group: The group receives a combination of FDBA+ BFPSC and PRF for sinus augmentation

Category
Treatment - Surgery

2

Description
Control group: The group receives a combination of FDBA (lacking any cells) and PRF for sinus augmentation

Category
Treatment - Surgery

Recruitment centers
