Effect of education based on Health Belief Model on protective behaviors against Human Papillomavirus in vulnerable women

Protocol summary

2017-03-01, 1395/12/11

Summary

The aim of this study is to assess the effect of Health Belief model based education on protective behaviors against Human Papillomavirus in vulnerable women. This study design is a cluster randomized clinical trial without blinding and randomization divides centers two groups, control and intervention and takes place in two phases. The first phase of it is study tool construction and the second is educational intervention. Since the study primary outcome variables which is health-belief model structures, is supposed to be applied for the first time, researchers need to implement the first phase of the study to build the assessment tools, then proceed to the study intervention. The study population is substance abuser women, referring to the drop-in centers, harm reduction centers and camps who are over 18 years old, sexually active, able to read and write. The study Intervention is Health Belief model based education including providing information about human papillomavirus for vulnerable women, based on the pattern structures. The primary outcomes of this study are perceived susceptibility, perceived severity, perceived benefits, perceived barriers, cues to action and self efficacy. The effect of intervention on samples will be measured immediately, four weeks and twelve weeks later by researcher made tools.

Health conditions studied

1

Description of health condition studied

Humanpapillomavirus

ICD-10 code

B07

ICD-10 code description

Viral infections characterized by skin and mucous membrane lesions

Primary outcomes

1

Description

Perceived Susceptibility

Timepoint

Before the intervention, 4 weeks and 12 weeks after the intervention

Method of measurement

Researcher made tools with the 5 items Likert scale

2

Description

Perceived Severity

Timepoint

Before the intervention, 4 weeks and 12 weeks after the intervention

Method of measurement

Researcher made tools with the 5 items Likert scale

3

Description

Perceived Benefits

Timepoint

Before the intervention, 4 weeks and 12 weeks after the intervention

Method of measurement

Researcher made tools with the 5 items Likert scale

4

Description

Perceived Barriers

Timepoint

Before the intervention, 4 weeks and 12 weeks after the intervention

Method of measurement

Researcher made tools with the 5 items Likert scale

5

Description

Cues to Action

Timepoint

Before the intervention, 4 weeks and 12 weeks after the intervention

Method of measurement

Researcher made tools with the 5 items Likert scale

6

Description

Self Efficacy

Timepoint

Before the intervention, 4 weeks and 12 weeks after the intervention

Method of measurement

Researcher made tools with the 5 items Likert scale

7

Description

Protective Behavior of Human Papillomavirus

Timepoint

Before the intervention, 4 weeks and 12 weeks after the intervention

Method of measurement

Researcher made tools with the 5 item Likert scale

Secondary outcomes

1

Description

Number of Safe Sex

Timepoint

Before, 4 weeks ,12 weeks after intervention

Method of measurement

Questionary

2

Description

Number of partner

Timepoint

Before, 4 weeks ,12 weeks After intervention

Method of measurement

Questionary

3

Description

Number of sexual relationship types

Timepoint

Before, 4 weeks ,12 weeks After intervention

Method of measurement

Questionary

Intervention groups

1

Description

Intervention Group: In this group, intervention is protective behavior of papillomavirus education base on Health Belief model structures. The number of meetings and training content will be determined after needs assessment and includes condom use in sex with a partner who has high risk behaviors, Having sex within marriage, Not having oral and anal sex and not smoking and recognition virus signs in partner.

Category

Prevention

2

Description

Control group: The control group only receive Routine training of centers which they will be referred.
