Comparison of blood flow restriction strength training and traditional strength training on myostatin, muscle mass and some physiological factors in middle-age women

Protocol summary

Summary

Objectives: The purpose of this study is to compare the effect of strength training with blood flow restriction and traditional strength training on myostatin, muscular mass and some related-muscle physiological factors in middle-age women. **Design:** A semi-experimental study and pretest and post test design with two experimental groups and a control group, 29 healthy middle-age female voluntarily participated in study. **Setting and contact:** Subjects were randomly assigned into three groups: blood flow restriction strength training, traditional strength training and control. The training program performed for eight weeks and three times per week. Strength, muscular mass and blood samples were measured before and after the exercise training. **Participants including major eligibility criteria were physical healthy and aged 45 through 55 and excluding major eligibility criteria were illness and blood pressure above 14/10. Intervention:** 8 weeks of strength training with blood flow restriction and traditional strength training. **Main outcome measures:** myostatin, muscular mass, stretch.

General information

Acronym

Effect of strength training with and without blood flow restriction on myostatin and some physiologi

Scientific title

Comparison of blood flow restriction strength training and traditional strength training on myostatin, muscle mass and some physiological factors in middle-age women

Public title

Comparison of two strength training on some muscular factors in middle-age women

Purpose

Other

Inclusion/Exclusion criteria

Including major criteria: healthy; 45 to 55years old.
Excluding major criteria: illness; blood pressure.

Age

From **42 years** old to **50 years** old

Gender

Female

Phase

2

Groups that have been masked

No information

Sample size

Target sample size: **29**

Randomization (investigator's opinion)

Randomized
