Comparison of Vaginal Progesterone and Oral Micronized Progesterone on Pregnancy Outcomes in Women with Threatened Miscarriage

Protocol summary

Study aim
the effect of micronized progesterone and progesterone suppository on pregnancy survival compars in pregnant women threatened with abortion.

Design
Two parallel groups randomized trial, not blinded, single center

Settings and conduct
170 pregnant women threatened with abortion from kowsar hospital which were satisfied to participate in the study were selected and randomly allocated in one of the groups A and B. For the A group micronized progesterone was prescribed and for the group B progesterone suppository was prescribed.

Participants/Inclusion and exclusion criteria
Pregnant women with a gestational age of more than 6 weeks and less than or equal to 13 weeks, presenting with a closed cervix on vaginal examination and exhibiting symptoms of threatened miscarriage, such as bloody discharge or uterine bleeding with or without pain, were considered eligible for inclusion in the study.Exclusion criteria included absence of fetal heartbeat, confirmation of fetal or uterine abnormalities, multiple pregnancy or hydatidiform pregnancy.

Intervention groups
to one group progesterone suppository is given 400 milligrams per day and to the other group 100 milligrams of progesterone capsule is given per day.

Main outcome variables
Pregnancy residues ;pre term delivery ; complications of post consumption of medicines.

General information

Reason for update
Due to the coincidence of the sampling with the corona pandemic, the sampling has started with a delay.In addition, during the research, changes were made in the way it was done, and we are required to record these changes and approve them.

Scientific title
Comparison of Vaginal Progesterone and Oral Micronized

Progesterone on Pregnancy Outcomes in Women with Threatened Miscarriage

Public title
Comparison of the effect of two progesteron drugs in protection of abortion
Purpose
Treatment
Inclusion/Exclusion criteria
Inclusion criteria:
Gestational age 6 to 13 weeks Apearance of fetal heart rate Uterine bleeding Closed uterine orifice
Exclusion criteria:
Having embryonic or uterine anomalies in ultrasound Multi fetal Hydatidiform mole A known underlying disease in mother Patients who have been treated by a specific medication to treat abortion the absence of fetal heartbeat, malignancy presence of anorectal disorders genital tract infections endocrine disorders cardiovascular disorders progesterone hypersensitivity refusal to participate
Age
No age limit
Gender
Female

Phase
3
Groups that have been masked
No information
Sample size
Target sample size: **160**
Actual sample size reached: **170**
Randomization (investigator's opinion)
Randomized
Randomization description
Medications are encoded in separate envelopes and delivered to the participants.
Blinding (investigator's opinion)
Not blinded
Blinding description
Placebo

Health conditions studied

1

Description of health condition studied
Abortion
ICD-10 code
-
ICD-10 code description
-

Primary outcomes

1

Description
Abortion
Timepoint
From the start of the intervention up to end of pregnancy
Method of measurement
Weekly visit until the end of bleeding

Secondary outcomes

1

Description
Preeclampsia
Timepoint
Up to 28 weeks monthly until 36 weeks every two weeks and thereafter weekly until delivery
Method of measurement
Mercury pressure gauge

2

Description
Gestational Diabetes
Timepoint
Up to 28 weeks monthly until 36 weeks every two weeks and thereafter weekly until delivery
Method of measurement
Glucose tolerance test

Intervention groups

1

Description
Intervention group: Progesterone suppository 400 milligrams per day
Category

Treatment - Drugs

2

Description
Intervention group: Progesterone capsule 100 mg per day
Category
Treatment - Drugs

Title and more details about the data/document
Information is the most commonly used questionnaire, which is a statistical analysis

When the data will become available and for how long
Starting 1 years after publication .

To whom data/document is available
Only available for people working in academic institutions

Under which criteria data/document could be used
Path analysis

From where data/document is obtainable
Dr Hamideh Pakniat executor of plan

What processes are involved for a request to access data/document
The email will be submitted to the project promoter at the discretion of the information.
