Clinical Trial Protocol
Iranian Registry of Clinical Trials

02 Nov 2026

Design, implementation and evaluation, the effect of Based intervention on transactional model on stress management and quality of life among dialysis patients in Tehran city (a mixed method research).

Protocol summary

Study aim
General purpose: Determining the effect of intervention based on the transactional model on the stress and quality of life of dialysis patients

Design
Semi-experimental study, with parallel groups of intervention and control, one-sided blind, sample size of 58 people in each group, randomized

Settings and conduct
Participants in this study will have dialysis patients undergoing dialysis centers in Tehran. The location of the study will be in dialysis centers. The method of doing this study as a group training stress management based on a transectional model for dialysis patients at the center of dialysis. The study will be one Blind as patients will be unaware of being in the control group or intervention during the study.

Participants/Inclusion and exclusion criteria
The criteria for entering the study include chronic kidney disease, Tehran residents undergoing hemodialysis, waiting for a transplant, having a case at the dialysis center, the ability to attend educational sessions, having at least a reading and writing literacy and no history of chronic psychological illness and exclusion criteria include receiving psychiatric treatment, illiterate people, and having a history of relevant training.

Intervention groups
The intervention will be based on model structures for managing stress in dialysis patients and will be tailored to the content and time required in the intervention group. The control group also receives routine training after the study.

Main outcome variables
Educational intervention; Initial assessment; Secondary evaluation; Coping efforts; Meaningful counteraction; Modulators; stress management; Quality of Life

Scientific title
Design, implementation and evaluation, the effect of Based intervention on transactional model on stress management and quality of life among dialysis patients in Tehran city (a mixed method research).

Public title
Design, implementation and evaluation, the effect of Based intervention on transactional model on stress management and quality of life among dialysis patients
Purpose
Education/Guidance
Inclusion/Exclusion criteria
Inclusion criteria:
Chronic kidney disease Residing in Tehran Hemodialysis treatment Waiting for the link Having a case at the dialysis center Ability to attend training sessions Have at least reading and writing skills Not having chronic psychiatric illness
Exclusion criteria:
Getting psychiatric treatment Uneducated people History of related training
Age
From **30 years** old
Gender
Both

Phase
N/A
Groups that have been masked

- Participant
- Care provider

Sample size
Target sample size: **116**
Actual sample size reached: **116**
Randomization (investigator's opinion)
Randomized
Randomization description
a simple accident
Blinding (investigator's opinion)
Single blinded
Blinding description
Participants will be randomly assigned to one of the observation or intervention groups.
Placebo
Not used
Assignment
Parallel

Approval date
2018-05-06, 1397/02/16
Ethics committee reference number
IR.SSU.SPH.REC.1397.012

Health conditions studied

1

Description of health condition studied
Dialysis disease
ICD-10 code
R88.0
ICD-10 code description
Cloudy (hemodialysis) (peritoneal) dialysis effluent

Primary outcomes

1

Description
Stress Score in Hemodialysis Patients' Stress Questionnaire
Timepoint
Before starting the study, 3 months after the study
Method of measurement
Stress questionnaire in hemodialysis patients

Secondary outcomes

1

Description
Quality Of Life Score
Timepoint
Before the intervention, three months after the intervention
Method of measurement
Quality of life questionnaire in hemodialysis patients

Intervention groups

1

Description
Intervention group: Using educational content during eight sessions based on interactive model of Lazarus and Folkman to increase stress management in hemodialysis patients.
Category
Behavior

2

Description
Control group: During the interventions, no training was received, but after the intervention, relevant training was provided to the control group To be placed.

Category
N/A
