The effects of Pilates training on static and dynamic balance of deaf students

Protocol summary

Study aim

The purpose of this study the effects of Pilates training on static and dynamic balance of deaf students.

Design

In this study, 19 students who are deaf and Inclusion criteria of the study, the deaf school in Rasht city elected. The participants were randomly divided into experimental group (10 subjects) and a control group (9 subjects) is divided and each participant is assigned a code.

Settings and conduct

The current study is of clinical trial one aiming to the effects of Pilates training on static and dynamic balance of deaf students. It will be used the BESS test for static balance and the Y test (YBT) for dynamic balance.

Participants/Inclusion and exclusion criteria

The inclusion criteria: age of 11-19; hearing range of more than 75 db and avoidance of medicines that affect balance during research procedure. The exclusion criteria: avoidance of participating in the relevant sessions and not completing the length of training period; cardiovascular and respiratory disease.

Intervention groups

The experimental group has performed Pilates training, and the control group did not receive any exercise programs.

Main outcome variables

Rehabilitation of the Deaf - Improved balance in the deaf
- Improved postural control in the deaf.

Scientific title

The effects of Pilates training on static and dynamic balance of deaf students

Public title

The effect of the training program on the balance of deaf students

Purpose

Supportive

Inclusion/Exclusion criteria

Inclusion criteria:

The inclination of participation in the research
 The refraining of tranquilizers or those with effects on balance
 The Lack of cochlear implantation
 The hearing range of more than 75 db.
 Avoidance of exercising or any intense activities during the research
 No lower limb damage background during the past 6 months or any neural or muscular complexities
 No eyesight disorder
 Lack of any status abnormalities effective in the procedure of the research (in the lower and upper limbs)
 Not surgical background in the past year
 Not a fracture in the upper and lower limbs a year prior to research
 Non-insulin-dependent diabetes
 Girls subjects

Exclusion criteria:

Lack of participation in two sequential practice sessions or in three interrupted practice sessions
 The advent of Musculoskeletal pain after practice
 Students suffering from multiple disabilities
 Students cardiovascular and respiratory diseases
 Students articular system and orthopedic disorders including neck pain, backache, rheumatoid arthritis or the apparent difference in the length of the limbs

Age

From **11 years** old to **19 years** old

Gender

Female

Phase

3

Groups that have been masked

No information

Sample size

Target sample size: **19**

More than 1 sample in each individual

Number of samples in each individual: **1**

In each person, the tests of static and dynamic balance are measured.

Randomization (investigator's opinion)

Randomized

Randomization description

Subjects are randomly assigned randomly with the help of a random number table in one of the two groups and receive intervention from the same group.

Blinding (investigator's opinion)

Not blinded

Title and more details about the data/document

The total potential data can be shared after unidentifiable people.

When the data will become available and for how long

Start the access period 6 months after printing the results.

To whom data/document is available

Everyone in the community can use it.

Under which criteria data/document could be used

- For deaf rehabilitation fields. - For trainers and sports science teachers. - in the field of occupational therapy. - In sports fields of the disabled.

From where data/document is obtainable

Applicants may refer to rehabilitation and sports science journals for receiving data.

What processes are involved for a request to access data/document

Extensions can be submitted to the following email address within six months after the results are printed.
Email Address: zareei.h@yahoo.com
