

# Clinical Trial Protocol

## Iranian Registry of Clinical Trials

15 Jun 2026

**to compare the effect of trunk core stability training and TRX on the performance, balance and strength of athletes with ankle sprain**

### Protocol summary

#### Study aim

The purpose of the present study was to compare the effect of Core Stabilization Exercises and TRX on the performance, strength and balance of athletes with ankle sprain

#### Design

Clinical trials with control group, with parallel groups, randomized

#### Settings and conduct

The subjects of the training groups did exercises for 8 weeks and 3 sessions per week recording each protocol. During the 8 weeks, the control group did not do any activity. Evaluation of variables was done 48 hours before and after. Functional status assessment was performed by functional tests. The mutation test was executed in a 5-foot-long, five-meter-long path, marked with two cones. Each subject performed the test twice and then the best record was recorded. In order to evaluate the dynamic balance, Y balance test and the Stack test was used to evaluate the static balance.

#### Participants/Inclusion and exclusion criteria

Entry requirements : ankle sprain which causes pain or lagging for more than one day feeling of weakness pain, or chronic instability that attributed to early sprain and the experience of wiping out 6 months before the start of the study. Exit criteria: ankle fracture and bilateral ankle sprain as well as a history of knee ACL injury

#### Intervention groups

Different groups of research included each group of 10 people Group 1: Stabilization Exercises Group 2: TRX training Group 3: combined exercises (central stability + TRX) Group 4: controls

#### Main outcome variables

Lateral mutation test , Y balance test, Stack TEST

### General information

#### Reason for update

#### Acronym

#### IRCT registration information

IRCT registration number: **IRCT20170510033909N4**

Registration date: **2019-07-06, 1398/04/15**

Registration timing: **retrospective**

Last update: **2019-07-06, 1398/04/15**

Update count: **0**

#### Registration date

2019-07-06, 1398/04/15

#### Registrant information

##### Name

فرزانه تقيان

##### Name of organization / entity

دانشگاه آزاد اسلامی. واحد اصفهان

##### Country

Iran (Islamic Republic of)

##### Phone

+98 913 308 0241

##### Email address

f.taghian@khuisf.ac.ir

#### Recruitment status

**Recruitment complete**

#### Funding source

#### Expected recruitment start date

2018-06-22, 1397/04/01

#### Expected recruitment end date

2018-07-21, 1397/04/30

#### Actual recruitment start date

2018-08-06, 1397/05/15

#### Actual recruitment end date

2018-08-06, 1397/05/15

#### Trial completion date

2018-10-23, 1397/08/01

#### Scientific title

to compare the effect of trunk core stability training and TRX on the performance, balance and strength of athletes with ankle sprain

**Public title**

to compare the effect of trunk core stability training and TRX on the performance, balance and strength of athletes

**Purpose**

Other

**Inclusion/Exclusion criteria****Inclusion criteria:**

Inclusion criteria to enter the study A history of an ankle sprain that leads to pain or lagging for more than a day feeling of weakness pain, or chronic instability attributed to the early sprain the experience of wiping out 6 months before the start of the study

**Exclusion criteria:**

Exit criteria in this study were ankle fracture bilateral ankle sprain and also a history of knee ACL injury

**Age**

From **19 years** old to **26 years** old

**Gender**

Female

**Phase**

N/A

**Groups that have been masked**

*No information*

**Sample size**

Target sample size: **40**

Actual sample size reached: **40**

**Randomization (investigator's opinion)**

Randomized

**Randomization description**

Randomization is based on a single sequence of random assignments that is called simple randomization. The Roll of a die method is used for three group studies. The numbers 1 and 2 for the first group were numbers 3 and 4 for the second group and the numbers 5 and 6 for the third group.

**Blinding (investigator's opinion)**

Not blinded

**Blinding description****Placebo**

Not used

**Assignment**

Parallel

**Other design features****Secondary Ids**

empty

**Ethics committees****1****Ethics committee****Name of ethics committee**

Ethics committee of khorasgan University

**Street address**

No.3 Baharan ave.Ostad shahriar jonobi st .Robot

**City**

isfahan

**Province**

Isfahan

**Postal code**

81838-95153

**Approval date**

2018-06-03, 1397/03/13

**Ethics committee reference number**

lr.iau.khuisf.rec.1397.018

**Health conditions studied****1****Description of health condition studied**

Ankle sprain

**ICD-10 code**

S93

**ICD-10 code description**

Dislocation and sprain of joints and ligaments at ankle, foot and toe level

**Primary outcomes****1****Description**

Performance, Static Balance, Dynamic Balance

**Timepoint**

At the beginning of the study, eight weeks after the implementation of the sports protocols

**Method of measurement**

Function: Mutation test. Static mode: Stroke. Dynamic balance y

**Secondary outcomes**

empty

**Intervention groups****1****Description**

Intervention group 1: Core Stabilization Exercises

**Category**

Rehabilitation

**2****Description**

Intervention Group 2: TRX exercises

**Category**

Rehabilitation

**3****Description**

Control group: Routine care

**Category**

Rehabilitation
