

Clinical Trial Protocol

Iranian Registry of Clinical Trials

10 Jun 2026

Effects of *Mangifera indica* extract supplement on metabolic status in type 2 diabetic patients

Protocol summary

FBS; 2HPP; fasting insulin; lipid profiles; BMI

Study aim

Determination of the Effect of Mango Leaf Extract on Metabolic Indices of Patients with Type 2 Diabetes including Fasting Blood Sugar, 2hpp, Lipid Profile, BMI

Design

This is a randomized Double-blinded clinical trial with two parallel groups in Phase 3. In this study 40 patients with type 2 diabetes referring to specialized clinic and Then, patients were randomly divided into two control and intervention groups.

Settings and conduct

This study will be carried out in the specialized clinic of Kerman University of Medical Sciences. In this study, patients were randomly divided into drug and placebo groups using randomization software. Patients and drug providers are not aware of the type of capsules they receive. At the beginning and at the end of the study, 10 ml of fasting venous blood was taken from all patients. Anthropometric characteristics data of patients will be recorded. At the beginning and end of the study, fasting glucose, 2hpp, fasting insulin, and lipid profiles will be determined.

Participants/Inclusion and exclusion criteria

Inclusion criteria: type 1 diabetes based on World Health Organization Guidelines from at least 6 months ago; taking oral hypoglycemic drugs; age 25-60 years old. Exclusion criteria: changes in blood glucose drugs from 2 months prior to study; insulin use; smoking; pregnancy; use of herbal medications; lactation; digestive and liver problems; hormonal problems such as thyroid dysfunction; heart problems; consumption drugs that interfere with blood sugar and lipid levels; such as non-steroidal anti-inflammatory drugs.

Intervention groups

Patients with age between 25 to 60 years old with type 2 diabetes receive 500 mg capsules containing mango leaf extract twice daily (before lunch and before dinner) for 45 days.

Scientific title

Effects of Mangifera indica extract supplement on metabolic status in type 2 diabetic patients

Public title

Effect of mango leaf on diabetes on lipid profiles

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:

Type 1 Diabetes According to the World Health Organization's online guide from 6 months ago Taking blood sugar lowering drugs

Exclusion criteria:

Changes in diabetes medications from 2 months before the study Insulin consumption Smoking Pregnancy Use of herbal medications Lactation Gastrointestinal and liver problems Hormonal problems such as thyroid dysfunction Cardiac problems Medications that interfere with blood sugar and lipid levels such as non-inflammatory drugs Steroid

Age

From **25 years** old to **60 years** old

Gender

Both

Phase

3

Groups that have been masked

- Participant
- Care provider
- Investigator
- Outcome assessor

Sample size

Target sample size: **40**

Randomization (investigator's opinion)

Randomized

Randomization description

By random allocation software

Blinding (investigator's opinion)

Double blinded

Blinding description

Drug coding will be done by a third party and during the study, not everyone, including physicians, patients, and those responsible for drug delivery will be aware of the type of drug used and the placebo.

Placebo

Health conditions studied

1

Description of health condition studied

Diabetes

ICD-10 code

E08

ICD-10 code description

Diabetes mellitus due to underlying condition

Primary outcomes

1

Description

Fasting blood sugar

Timepoint

Baseline and 45 days after the intervention

Method of measurement

Fasting serum Glucose concentration in mg/dl by kit

2

Description

2 hours post prandial

Timepoint

Baseline and 45 days after the intervention

Method of measurement

Fasting serum Glucose concentration in mg/dl by kit

3

Description

Fasting Insulin

Timepoint

Baseline and 45 days after the intervention

Method of measurement

Fasting serum Insulin concentration in μ U/ml by kit

4

Description

Serum Triglycerid

Timepoint

Baseline and 45 days after the intervention

Method of measurement

Fasting serum Triglycerid concentration in mg/dl by kit

5

Description

Serum cholestrol

Timepoint

Baseline and 45 days after the intervention

Method of measurement

Fasting Serum cholestrol concentration in mg/dl by kit

6

Description

LDL Cholestrol

Timepoint

Baseline and 45 days after the intervention

Method of measurement

Fasting Serum HDL Cholestrol concentration in mg/dl, calculating by Friedewald formula

7

Description

HDL Cholestrol

Timepoint

Baseline and 45 days after the intervention

Method of measurement

Fasting Serum HDL Cholestrol concentration in mg/dl by kit

8

Description

Body mass index

Timepoint

Baseline and 45 days after the intervention

Method of measurement

Weight to square height ratio

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: Mango leaf extract 500 mg, twice daily, for 45 days

Category

Treatment - Other

2

Description

Control group: Placebo 500 mg twice daily for 45 days

Category

Placebo

Title and more details about the data/document

After the completion of the study, the information on the main outcome will be shared.

When the data will become available and for how long

10 months after printing

To whom data/document is available

All researchers can take action.

Under which criteria data/document could be used

Data and results will be available to all researchers for research on diabetes.

From where data/document is obtainable

To email: hashemifa67@gmail.com

What processes are involved for a request to access data/document

The data will be provided to the applicant after a review

and approval of the request within a month.
