Evaluation the efficacy of a syrup of Echium amoenum-Melissa officinalis in treatment of adolescents with Obsessive-Compulsive Disorder

Protocol summary

Study aim

Evaluation the efficacy of a syrup of Echium Amoenum-Melissa Officinalis in treatment of adolescents with Obsessive-Compulsive Disorder

Design

Randomized clinical trial, including intervention and control groups with parallel groups, double-blind The random allocation sequence using the random number table is www.randomization.com. The method of allocation concealment: indoor envelopes. The sample size is 20 people in each group.

Settings and conduct

Recruitment center: Child Psychaitry clinic at Ibn-e-Sina hospital Patients are evaluated by pediatric psychiatrist with Yale Brown Obsessive-Compulsive questionnaire in children and divided into intervention and control groups by simple randomization method. Patients and outcome assessors are unaware of the individuals assigned to the groups.The Yale Brown Obsessive-Compulsive questionnaire for Children is administered in week 4 and 8 of the study and questionnaires of quality of life, Anxiety, and Depression are completed at the beginning and end of the study for patients.

Participants/Inclusion and exclusion criteria

Inclusion criteria: Obsessive-Compulsive Disorder with a diagnosis of pediatric psychiatry according to DSM-5 criteria; Ages 13 to 17 years Exclusion criteria: Psychosis; Bipolar disorder; Catatonic symptoms; Drug abuse; Severe or debilitating illnesses; Phenobarbital consumption; Oxazepam consumption; Sedative drugs consumption

Intervention groups

Intervention group will receive a herbal syrup, 0.3 milliliter per kilogram of body weight and 50 mg Fluvoxamine tablets daily and the control group will receive placebo syrup and 50 mg Fluvoxamine tablets daily for 8 weeks.

Main outcome variables

Obsessive score on children's Yale-Brown Obsessive Compulsive questionnaire

General information

Reason for update

Need to limit the target group to adolescents to standardize the dose of the drug; Inclusion of all adolescents with obsessive-compulsive disorder (of varying severity) in the study

Actual sample size reached: **40**

Randomization (investigator's opinion)

Randomized

Randomization description

Patients are divided into Intervention and control groups using simple randomization (www.randomization.com). How to hide the allocation is with closed envelopes.

Blinding (investigator's opinion)

Double blinded

Blinding description

Patients in this study are unaware that they are assigned to a control or intervention group. Intervention group will receive Echium amoenum-Melissa officinalis syrup and fluoxamine tablets. Control group will receive placebo and fluoxamine tablets.The outcome assessor is also unaware of which group the patient belongs to.

Health conditions studied

1

Description of health condition studied

Obsessive-Compulsive Disorder

ICD-10 code

F42.2

ICD-10 code description

Mixed obsessional thoughts and acts

Primary outcomes

1

Description

Obsessive score on children's Yale-Brown Obsessive Compulsive questionnaire

Timepoint

pretest, 4 weeks after beginning, post-test (at the end of 8 weeks)

Method of measurement

children's Yale-Brown Obsessive Compulsive questionnaire

Secondary outcomes

1

Description

Quality of life score

Timepoint

pretest, post-test (at the end of 8 weeks)

Method of measurement

The World Health Organization Quality of Life Questionnaire

2

Description
Anxiety score
Timepoint
pretest, 4 weeks after beginning, post-test (at the end of 8 weeks)
Method of measurement
Spence Children's Anxiety Questionnaire

3

Description
Depression score
Timepoint
pretest, 4 weeks after beginning, post-test (at the end of 8 weeks)
Method of measurement
Maria Kovas Depression Questionnaire

Intervention groups

1

Description
Intervention group will receive a Echium amoenum-Melissa officinalis syrup, 0.3 milliliter per kilogram of body weight and 50 mg Fluvoxamine tablets daily for 8 weeks.
Category
Treatment - Drugs

2

Description
Control group will receive placebo syrup and 50 mg Fluvoxamine tablets daily for 8 weeks.
Category
Placebo
