The effect of NOSCOVID on pulmonary & other clinical manifestations of COVID-19 patients

Protocol summary

Study aim

Determining the effect of novel formulation (NosCOVID) on clinical and pulmonary manifestations of COVID-19 patients

Design

This study is double blinded clinical trial in phase 2 which will be carried out on 125 COVID-19 patients into two groups (hospitalized & non-hospitalized patients). Both groups randomly divided into two groups. Control group and treatment group which received of medicine (Noscapine 25 mg). Clinical signs of patient including body temperature, cough, Shortness of breath, respiratory rate, and O₂ saturation will be recorded before and after treatment. Diagnostic imaging will be carried out before and after treatment. Radiological and clinical Findings will be assessed by pulmonologist and other relevant clinicians.

Settings and conduct

This clinical trial will be carried out on 125 COVID-19 patients into two groups (hospitalized & non-hospitalized patients) in Velayat hospital of Qazvin. Patient will received medicine based on defined protocol. In this study patients, nurse, intern and researcher don't know which group of patients will use the medicine. Physician and clinicians team know about the drug and group who use the drug.

Participants/Inclusion and exclusion criteria

COVID-19 patient with Positive PCR test & CT finding

Intervention groups

This clinical trial will be carried out on 125 COVID-19 patients into two groups (hospitalized & non-hospitalized patients). Both groups divided into two groups. Control group and treatment group which received of medicine (Noscapine 25 mg)

Main outcome variables

Body temperature- Pain- cough- Shortness of breath- respiratory rate- O₂ saturation-

Scientific title

The effect of NOSCOVID on pulmonary & other clinical manifestations of COVID-19 patients

Public title

The effect of Noscapine on clinical and pulmonary manifestations of COVID-19 patients

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:

Positive PCR test for Coronavirus (SARS-COV2) CT Scan finding

Exclusion criteria:

Patient who use warfarin Patient who ACEI (captopril, enalapril,...)

Age

From 2 years old

Gender

Both

Phase

2

Groups that have been masked

- Participant
- Care provider
- Investigator
- Outcome assessor

Sample size

Target sample size: 125

Randomization (investigator's opinion)

Not randomized

Randomization description

Blinding (investigator's opinion)

Double blinded

Blinding description

In this study patients, nurse , supervisor and researcher don't know which group of patients will use the medicine. Physician and clinicians team know about the drug and group who use the drug.
