

Clinical Trial Protocol

Iranian Registry of Clinical Trials

10 Jun 2026

Effects of Specific Inferior Capsular stretching and Mobilization with movement in Adhesive Capsulitis

Protocol summary

Study aim

To compare the effect of Specific inferior capsular stretching and Mobilization with movement in Adhesive capsulitis.

Design

Two groups, single blinded, Randomised controlled trial.

Settings and conduct

Max Rehab Center of Riphah College of Rehabilitation & Allied Health Sciences. Data safety of this single blinded trial (Outcome Assessor Blind) will be ensured by assigning the participants different Specific identity numbers. All consent, reading forms will be placed in locker to blind the assessor.

Participants/Inclusion and exclusion criteria

Inclusion: 1. Both gender (male and females) 2. Patient Aged 40-60 years . 3. Shoulder pain at night that often disturb sleep.4. Difficulty in reaching behind the back.5. Reduced arm swing with walking.6. Stiff and painful shoulder more than 1 month.7. Minimum 50% of restriction in abduction & external rotation of shoulder joint. Exclusion: 1. Recent trauma in and around shoulder joint.2. History of shoulder subluxation, dislocation, or ligamentous injury.3. Intrinsic glenohumeral pathology as GH arthritis.4. Previous surgeries. 5. Subjects with diabetes.6. Surgical release of capsule.7. Subjects on steroids or NSAIDs

Intervention groups

Intervention Group A Mobilization with movement
Intervention Group B Specific inferior capsular stretching

Main outcome variables

Numeric Pain Rating Scale(NPRS) for Pain , Shoulder Pain and Disability Index (SPADI) for Pain and function and Universal Goniometry for Range of motion.

Scientific title

Effects of Specific Inferior Capsular stretching and Mobilization with movement in Adhesive Capsulitis

Public title

Effects of Specific inferior capsular stretching and Mobilization with movement in Adhesive capsulitis

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:

Both male and female patients will be included Patients with frozen shoulder aged 40-60 years will be recruited Shoulder pain at night that often disturb sleep Difficulty in reaching behind the back Reduced arm swing with walking Stiff and painful shoulder more than 1 month Minimum 50% of restriction in abduction & external rotation of shoulder joint

Exclusion criteria:

Recent trauma in and around shoulder joint History of shoulder subluxation, dislocation, or ligamentous injury Intrinsic glenohumeral pathology as GH arthritis Previous surgeries Subjects with diabetes Surgical release of capsule Subjects on steroids or NSAIDs

Age

From **40 years** old to **60 years** old

Gender

Both

Phase

N/A

Groups that have been masked

- Participant
- Outcome assessor

Sample size

Target sample size: **32**

Randomization (investigator's opinion)

Randomized

Randomization description

Once the above mentioned inclusion and exclusion criteria will be take into account, potential participants will be considered. Written informed consent will be taken. After enrollment into study, patient will be allocated either to Group A or Group B by Lottery method. No. of Chits will be equal to the total Sample Size. Odd numbers will be allocated to Group A and Even numbers will be allocated to Group B. Each patient will be requested to draw a chit from the box and after that patient will be recruited into either A or B group.

Blinding (investigator's opinion)

Single blinded

Blinding description

Outcome Assessor Blind: Data safety will be ensured by assigning the participants different Specific identity numbers. All consent, reading forms will be placed in locker to blind the assessor.

Health conditions studied

1

Description of health condition studied

Adhesive Capsulitis of Shoulder

ICD-10 code

M75.0

ICD-10 code description

Adhesive capsulitis of shoulder/Frozen shoulder/Periarthritis of shoulder

Primary outcomes

1

Description

Pain

Timepoint

Baseline, Before 1st treatment session and after 12th treatment session of total 6 weeks treatment plan (pre/post)

Method of measurement

Numeric Pain Rating Scale

2

Description

Range of motion

Timepoint

Baseline, Before 1st treatment session and after 12th treatment session of total 6 weeks treatment plan (pre/post)

Method of measurement

Goniometer

Secondary outcomes

1

Description

Pain & Function

Timepoint

Baseline, Before 1st treatment session and after 12th treatment session of total 6 weeks of treatment plan (pre/post)

Method of measurement

Shoulder Pain and Disability Index (SPADI)

Intervention groups

1

Description

Intervention group: Group A receiving Mobilization with movement

Category

Treatment - Other

2

Description

Intervention group: Group B receiving Specific inferior capsular stretching
