Study of the safety of hyperimmune bovine milk and colostrum against covid-19

Protocol summary

Study aim

Study of the safety of hyperimmune bovine milk and colostrum against Covid-19

Design

Clinical trial phase one, design of 40 healthy volunteers, non-random, without control group, with one intervention group, non-blinded.

Settings and conduct

After production of hyperimmune bovine colostrum and milk and receiving code of ethics from ethics committee of Isfahan University of Medical Sciences in the first phase of clinical trial (that the current clinical trial form is related to that) it is given to 40 healthy volunteer men that are interested in cooperation and participation in the study and consent form is filled by volunteers. If after 14 days they hadn't shown upper infection rate compared with ordinary people the trial goes to next phase.

Because the first phase is about assessing the immunity of the product the study is not blinded. Volunteer people live in Isfahan city and after receiving the milk will drink it in the presence of the executor. After 14 days the safety of the product is assessed through phone interview with volunteers. In the second phase hyperimmune colostrum and milk is given to 40 hospitalized patients of Alzahra hospital once a day for 5 days and their vital signs and experimental factors are assessed. Volunteer people should be interested in cooperation and participation in the study and sign the consent form.

Participants/Inclusion and exclusion criteria

-Inclusion Criteria Signing consent form of the study Free of underlying disease Not having clinical signs of Covid-19 infection -Exclusion Criteria Diseased person infected by Covid-19 or other diseases having underlying disease

Intervention groups

Intervention group is healthy volunteer people that will be given 100 cc of Hyperimmune milk and colostrum in the first day and after 14 days their clinical status will be

assessed through phone interview.

Main outcome variables

No complication and clinical symptoms

Title and more details about the data/document

Results of the processed data would be available

When the data will become available and for how long

One year after termination of the project.

To whom data/document is available

Researchers and related authorities in health system on the bases of official request.

Under which criteria data/document could be used

In order to obtain required permission for production of the product.

From where data/document is obtainable

Written letter to researcher should be send and then after evaluation, proper decision will be made

What processes are involved for a request to access data/document
