Investigating the Effect of Educational Program Based on The Theory of Planned Behavior on The Childbearing Intention in Childless Couples

Protocol summary

Study aim

Determining the effect of educational program based on the theory of planned behavior on the childbearing intention in couples without children

Design

Randomized parallel groups clinical trial with control group, phase 3 on 116 participants, without blinding. A table of random numbers is used for randomization.

Settings and conduct

The target population is couples referring to Andimeshk health centers, the research environment of Andimeshk Comprehensive Health Centers. The research samples will be selected from the centers. They will be randomly divided into two control and intervention groups (58 people in each group). two questionnaires of demographic and constructs of the Theory of Planned Behavior will be completed by participants. The intervention group will receive 3 sessions of 45-60 minute focusing on the constructs of the Theory of Planned Behavior. Immediately and one month after the end of the sessions, both groups will complete questionnaire and finally the scores of both groups will be compared to evaluate the effect of education.

Participants/Inclusion and exclusion criteria

Inclusion criteria: Age 18 to 45 years, not having children, Having been married for 2 years or more, unwilling to have children in the next 2 years, and exclusion criteria: pregnancy, having contraindications to pregnancy

Intervention groups

The intervention group will receive three educational sessions focusing on the constructs of the Theory of Planned Behavior. The control group will receive routine care.

Main outcome variables

Measuring the score of the constructs of the Theory of Planned Behavior Questionnaire before, immediately and one month after the intervention in the intervention and control groups

Scientific title

Investigating the Effect of Educational Program Based on The Theory of Planned Behavior on The Childbearing Intention in Childless Couples		Esfand Estreet, Golestan highway	
Public title	Effect of Educational Program Based on The Theory of Planned Behavior on The Childbearing Intention	City	Ahvaz
		Province	Khouzestan
		Postal code	00986135715794
Purpose	Education/Guidance	Approval date	2024-12-21, 1403/10/01
Inclusion/Exclusion criteria	Inclusion criteria: Age 18 to 45years Not having children Being Literate Having been married for 2 years or more Unwillingness to have children in the next 2 years Exclusion criteria: Pregnancy Having contraindications for pregnancy Unwilling to participate in the study	Ethics committee reference number IR.AJUMS.REC.1403.513	
		Health conditions studied	
		<u>1</u> Description of health condition studied childbearing intention ICD-10 code ICD-10 code description	
Age	From 18 years old to 45 years old	Primary outcomes	
Gender	Female	<u>1</u> Description The score of childbearing intention based on the theory of planned behavior Timepoint Before intervention, immediately after intervention and one month after intervention Method of measurement Researcher made questionnaire based on the Theory of Planned Behavior	
Phase	3	<u>2</u> Description The score of attitude based on the theory of planned behavior Timepoint Before intervention, immediately after intervention and one month after intervention Method of measurement Researcher made questionnaire based on the Theory of Planned Behavior	
Groups that have been masked	No information	<u>3</u> Description The score of subjective norms based on the theory of planned behavior Timepoint Before intervention, immediately after intervention and one month after intervention Method of measurement Researcher made questionnaire based on the Theory of Planned Behavior	
Sample size	Target sample size: 116	<u>4</u> Description	
Randomization (investigator's opinion)	Randomized		
Randomization description	The samples are selected by convenience sampling method, then divided into two groups using simple randomization method (random number table), one group is considered as control group and one group is considered as intervention group. To conceal allocation, the type of intervention is written on paper and numbered consecutively inside opaque envelopes (numbers 0-4 for the first group, numbers 5-9 for the second group) and will be delivered by the center secretary to the people referring to the study.		
Blinding (investigator's opinion)	Not blinded		
Blinding description			
Placebo	Not used		
Assignment	Parallel
