Comparative effects of Baduanjin exercises and Burn 2 Learn program on Physical and Mental performance among Teenagers.

Protocol summary

Study aim

To compare the effectiveness of Baduanjin exercises and Burn 2 Learn program on physical and mental performance among teenagers

Design

single blinded, parallel group, randomized clinical trial using convenience sampling,

Settings and conduct

The study will be conducted in Divisional public school and its branches in Faisalabad, Pakistan and the study duration will be 12 months.

Participants/Inclusion and exclusion criteria

Inclusion criteria Participants of age 13-16 years
Students of grade 8-10 Healthy individuals (BMI 18.5-24.9) Students of both gender Freshman, not participated in Baduanjin or Burn 2 Learn program
Exclusion criteria Participants with severe exercise contraindications, Cardiovascular diseases and Musculoskeletal disorders Sports injuries Connective tissue disorders Mentally retarded students Any injury in the upper or lower limb region in the past two years Neurological and musculoskeletal disorders that limit movement, and pain in the lower limb prior to and after the tests

Intervention groups

Participants will be split into two groups upon consent: For the period of 12 weeks, three days a week, and one hour each session, Group A will adhere to the Baduanjin exercise regimen (10 minutes for warm-up, 40 minutes for Qigong Baduanjin, and 10 minutes for cool-down). For the period of 12 weeks, Group B will participate in three sessions a week of the Burn 2 Learn program, completing 15-20 minutes of HIIT each session, which will include a warm-up and cool-down. The HIIT blends strength training (lunges, squat leaps, and push-ups) with cardio (dance, boxing, jumping jacks, and shuttle sprints).

Main outcome variables

Tools 20-meter multistage shuttle test for aerobic fitness

Standing long jump test for lower body strength and power Degree Push-Up for Upper body strength and power Warwick-Edinburgh Mental Well-Being Scale For mental performance

Scientific title
Comparative effects of Baduanjin exercises and Burn 2 Learn program on Physical and Mental performance among Teenagers.

Public title
Comparative effects of Baduanjin exercises and Burn 2 Learn program on Physical and Mental performance among Teenagers.

Purpose
Health service research

Inclusion/Exclusion criteria
Inclusion criteria:
Participants of age 13-16 years. Students of grade 8-10. Healthy individuals (BMI 18.5-24.9). Students of both gender. Freshman, not participated in Baduanjin or Burn 2 Learn program.
Exclusion criteria:
Participants with severe exercise contraindications, Cardiovascular diseases and Musculoskeletal disorders Sports injuries Connective tissue disorders Mentally retarded students Any injury in the upper or lower limb region in the past two years Neurological and musculoskeletal disorders that limit movement, and pain in the lower limb prior to and after the tests

Age
From **13 years** old to **16 years** old

Gender
Both

Phase
N/A

Groups that have been masked

Sample size
Target sample size: **70**
Actual sample size reached: **70**

Randomization (investigator's opinion)
Randomized

Randomization description
Basic randomization will be done using a table of random numbers. The randomization unit will be the individual. There will be no usage of stratification. The random sequence will be manually created from the database, and the allocation will be concealed in opaque, sealed envelopes with sequential numbers.

Blinding (investigator's opinion)
Single blinded

Blinding description
Participants will be the only ones unaware of the group assignment. They won't be informed of their intervention group assignment, and all settings and instructions will be standardized to prevent disclosure.

Placebo
Not used

Primary outcomes

1

Description

Aerobic fitness, Lower body strength and power, Upper body strength and Power, Mental performance

Timepoint

Interventions will continue for 12 weeks.

Method of measurement

20-meter multistage shuttle, Standing long jump test, Degree Push-Up, Warwick-Edinburgh Mental Well-Being

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: The Burn 2 Learn intervention will consist of the following components and execution methodologies. An authorized professional learning program for teachers will be held for one day (3 to 4 hours). This session seeks to provide intervention group

teachers with a thorough grasp of the intervention's rationale, including current data supporting the benefits of vigorous physical activity for cognitive and mental health. The study team will offer a brief 20-minute introduction presentation to principals and instructors. These courses will focus on the most recent research into the relationship between physical exercise, fitness, and academic accomplishment. Video clips with expert testimony on the relationship between physical exercise and cognition will be included in the seminars. Trained instructors will hold lessons at schools at lunchtime, recess, or free periods, utilizing a flexible delivery mode specified by each school. Schools are recommended to plan three sessions each week for 12 weeks. Students will engage in High-Intensity Interval Training (HIIT) for 15-20 minutes every session, including warm-up and cool-down. The HIIT program combines cardiovascular activities like shuttle sprints, jumping jacks, boxing, and dancing with muscle-building workouts like push-ups, squat jumps, and walking lunges. The intervals, which range from 8 to 16, follow a 30 second work, 30 second rest pattern, resulting in a 1:1 work-to-rest ratio. To increase motivation, HIIT classes will include a range of exercises and options throughout each session. Students will be able to pick between pre-planned High-Intensity Interval Training (HIIT) routines that include boxing, dancing, jogging, resistance training, and sport-specific HIIT (e.g., soccer, touch football, and basketball).

Treatment - Other

2

Description

Intervention group: Exercises program will be provided using Telerehabilitation to the instructors. The instructors will hold lessons at schools during lunchtime, free periods or recess time depending upon the availability of time. Participants will follow Baduanjin course for 12 weeks, 3 days a week, and 1 hour a day. Each lesson includes 10 minutes of warm-up, 40 minutes of Qigong Baduanjin exercises and 10 minutes of cool down.
